Travel Advisor Web Application	
Description	The holidays will be set from this web site. This application shall provide a window for the different places and tours that a visitor can view before traveling to a specific country. This site should guide him/her through from the start to the end of the journey.
Features	1. The user can register and login and land on a photo gallery of the top travel destinations. 2. A platform for booking a flight should be provided so the user can easily explore different airlines and book his flight. 3. A Rating system will be provided so the visitor can send his feedback and share his experience.
Constrains	• Web-based system / PC based • Unique user IDs • Admin features needed
Stakeholders	• User • Admin
